

# EpiNet® 2024 for office

## Get the most out of your data on your office PCs

**EpiNet® Office 2024 enables users to analyze their epi-run data conveniently at their office - independently from deposition campaigns in production.**

Please note that EpiNet® for office and EpiNet on measurement computers have the same functionality. Features described here are also available on measurement PCs with premium license.

<sup>1</sup> While possible, it is not recommended to replay data on the measurement computer as the configuration has to be changed and the system would not be ready for a live measurement.

### Features

- › Replay run data
- › Supports windows 7, 10 11
- › SQL database is mandatory for using EpiNet®:
  - › Works with SQL lite database and/or network database

### Licenses

- › Premium package for advanced analysis and process understanding
- › Possible as:
  - › Network licenses
    - Floating license with a fixed number of parallel users
    - Other models possible
  - › Hardware dongles for each individual office PC
- › Additional licenses for specific features

### Dive deep into your data with access to

- › Color plots
- › All analysis results
- › Create spec limits

### Replay run data<sup>1</sup>

- › Replay your data with different RunTypes
  - › Fine tune your measurement zones
- › Create detailed analysis recipes and test them on an actual measurement run
- › Gain full knowledge about your data
- › All information unplugged from measurement PC:
  - › No danger of data loss
  - › No interference with live measurement
- › Import created data on measurement PC:
  - › Analysis recipes
  - › RunTypes
